

# Cooling Discs

From the point of development to the finished product - Tröster is specialised in providing customised solutions for the drive technology on the European market.

The Tröster Maschinenbau GmbH is longtime manufacturer of components for drive technology.

The realization of customer-specific requirements within short delivery times is the core competence of our company.

Our product range includes aluminum cooling disks, the ideal components for heat dissipation. It prevents heat from being transported from the outside to the mounting and prevents the rolling bearings inside to overheat.

Cooling discs can be individually made for you according to your needs.

## Advantages at a glance:

- Fast, easy assembly due to split design
- High thermal conductivity through material Al 235 (G Al Si 5 Mg)
- Optimum heat transfer with shaft fitting k6
- Made in the mold casting process
